

ESS & GASP

Patient Name: _____ Date: _____

Height: _____ Weight: _____ DOB: _____

Epworth Sleepiness Scale (ESS)

The Epworth Sleepiness Scale helps determine how likely you are to doze off or fall asleep in the following situations, in contrast to just feeling tired.

This refers to your usual way of life in recent times. Even if you have not experience some of these activities recently, try to predict how they would affect you.

Use the following scale to choose the most appropriate number for each situation:

- 0** = I would never doze
- 1** = I have a slight chance of dozing
- 2** = I have a moderate chance of dozing
- 3** = I have a high chance of dozing

Situation	Chance of Dozing
1. Sitting and reading	_____
2. Watching TV	_____
3. Sitting inactive in a public place (e.g., a theater or a meeting).	_____
4. As a passenger in a car for an hour without a break	_____
5. Lying down to rest in the afternoon when circumstances permit	_____
6. Sitting and talking to someone	_____
7. Sitting quietly after a lunch without alcohol	_____
8. In a car while stopped for a few minutes in traffic	_____
	Σ _____

Graduated Apnea Screening Protocol (GASP)

Yes	No	Not Sure
